Cornwall

Brush your teeth twice a day!

Once during the day but most importantly before bed

Children need help to brush until they are old enough to tie their own shoelaces or until approximately the age of 8 years old.

If the bristles of the toothbrush are spread out or flattened then you are putting too much pressure on when cleaning - replace your toothbrush and brush more gently.

You should brush for a **minimum of 2 minutes** using a timer. There are fun mobile phone apps available to download which will help you with tooth brushing - why not have a look!

Drinks - water, milk, tea and coffee (without sugar) are great, but you should avoid fizzy, sugary drinks, milkshakes, smoothies and squash.

Remember to brush all surfaces - outside, inside, biting surfaces and the gums.

Only give your child **milk** in a feeding bottle - bottles should be discontinued at the age of one. From 6 months old use a beaker with a **free-flow lid** or an **open** cup with still water only - for more advice please ask your health advisor.

Always use fluoride toothpaste on your brush; a smear for under 3 year olds and a pea sized amount for over 3's.

Spit don't rinse! - Not even with water (the more contact teeth have with the toothpaste the better!)

Avoid eating sweet or sugary snacks between meals unless it's a treat - eat 3 healthy meals a day to allow your mouth to recover from acid attack (for great healthy eating advice please check out www.healthycornwall.gov.uk)

Replace your toothbrush at least once every 3 months.

Smoking creates gum problems - this can cause wobbly teeth and smelly breath.

You should visit a dentist at least once a year for a check up.
