Location

Disabled Parking

The main car park is free and is located at the rear of the building. There is adequate space for patients to be dropped off at the main entrance to the building.

There are no dedicated disabled parking bays; however, all parking and the entrance to the building is all on one level to ensure ease of access for all those parking on-site. The car park is shared with the hospital.

Outside Access from the Car Park

The main entrance is located at the front of the building. Access is all on one level with no steps or raised entrance ways.

Inside Access

After entering the main hospital waiting area there is an internal door which leads down a short corridor to the dental practice. All floors are vinyl.

Reception & Waiting Room

On entering the dental department reception is located as you enter. The patients use the main hospital waiting room and are brought through to the practice for their appointment. The flooring is level with vinyl flooring in reception and waiting area.

Treatment rooms

Treatment areas are accessed directly from reception area.
The treatment areas have level vinyl covered floors.
X-rays can be accessed in all rooms, with an OPG located off Surgery 2.

Toilet Facilities

There is a disabled toilet which is easily accessible, with the entrance located on the corridor leading to the Dental Practice.

Patient letters can be made available in other formats such as large print (on request at reception).

All staff have disability awareness training.

Interpreters can be provided with appropriate notice.

Assistance dogs

Assistance dogs are welcome in all dental clinics.

A nurse or member of reception team will support and guide the patient into the treatment bay and will remain with them throughout treatment and guide back to reception on completion.
